**Now with NanoPore Filter Technology
Get Complete Protection Against**

Pesticides

Microplastics

Industrial Waste
Like Lead & Mercury

<https://daneshwarienterprises.com/>

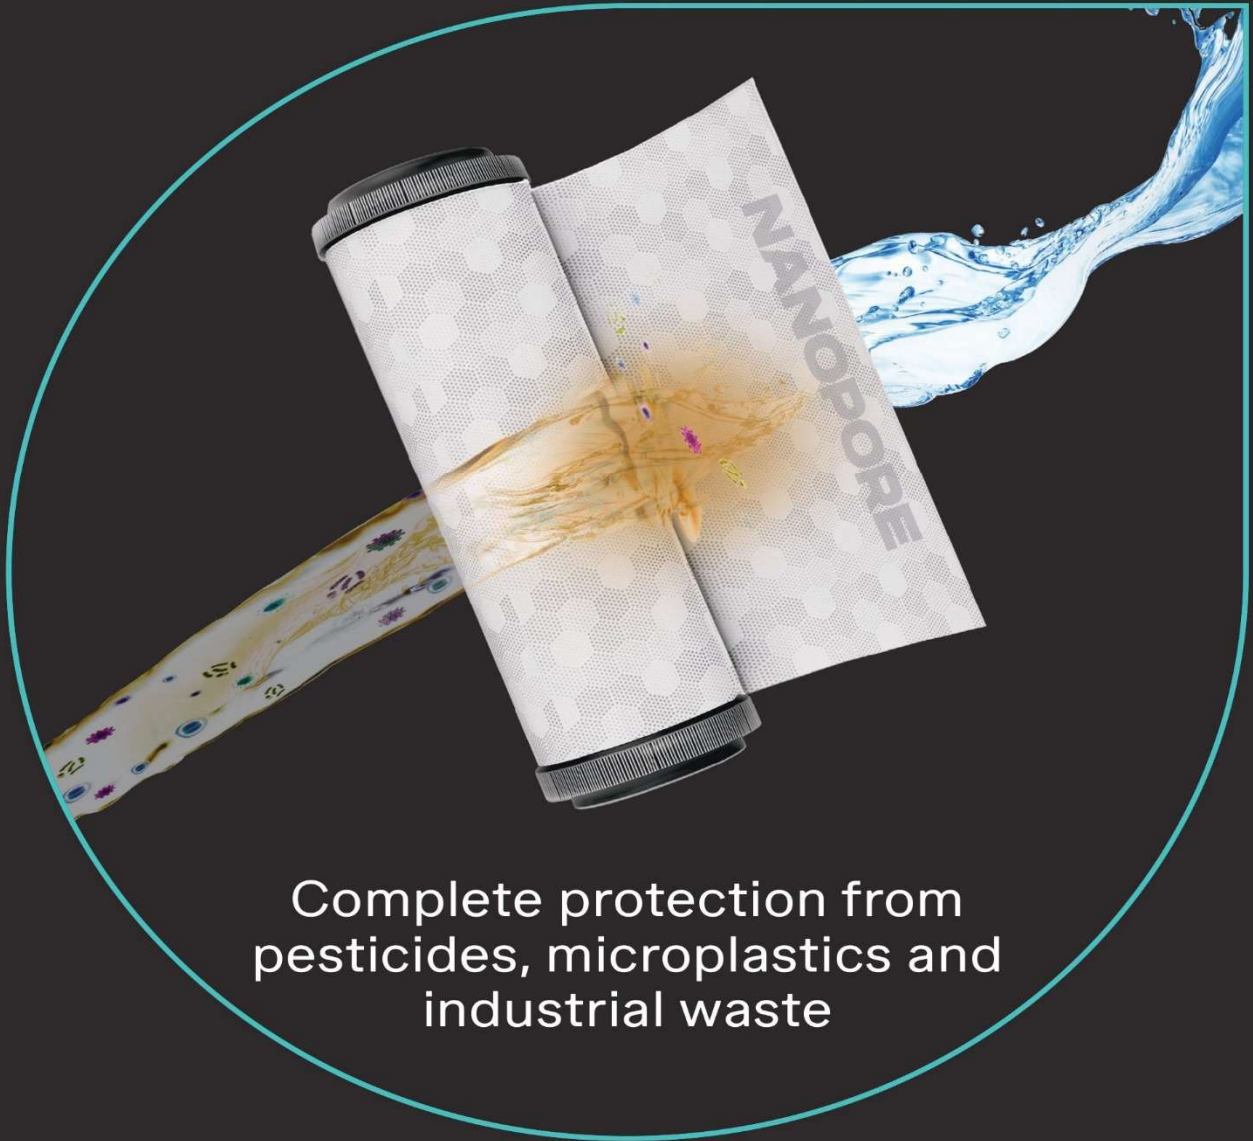

Over the years, water quality has worsened with pollutants such as pesticides, microplastics, and industrial waste like lead and mercury.

Ordinary filters get damaged quickly and do not give complete protection against such impurities.

Drinking water passing through these ordinary filters doesn't just cause immediate issues like vomiting and diarrhoea but prolonged consumption may lead to serious health risks such as cancer!

NANOPORE FILTER TECHNOLOGY

Complete protection from
pesticides, microplastics and
industrial waste

Removes
99.99%
bacteria, viruses
& cysts

More than **95%**
reduction of
contaminants like
lead and mercury

Additional
**Mega
Sediment
Filter**
